*"These old travellers'
Dream-tracks made mountains and caves
Artificial moon"*

Haiku by Alistair Gentry

Eons of sedimentary layering give life to metamorphic designs. An eternal cycle of transformation that composes the very essence of which planets are made. In the *Karst* bookcase, the lava stone fragments are resting on thin metal plates, like suspended imponderable matter in search of its cosmic balance.

Materials: bookcase with metal structure in dark bronze finishing. Water jet cut natural Lava stone elements fixed to the structure.

**Being elements selected from natural environment, dimensions and weight could be different on each piece.*

Dimensions (W x D x H): 320cm x 45cm x 145cm
