

PERFLECT bookcase

Design: Sam Baron
Production: JCP Universe, 2017

*"They need new mirrors
More than they need strange new worlds
To find aliens"*

Haiku by Alistair Gentry

A play of mirrors revealing new dimensions. Inspired from the middle age and renaissance gravures about the optical illusion and sense of depth, *Perflect* is a set of bookshelves-cabinets made of thin and elegant structures whose mirrored surfaces multiply the items placed inside, suggesting alternative realities.

Materials: bookcase with metal structure in embossed black finishing. All the surfaces are covered with supermirror steel panels.

Dimensions (W x D x H):
central unit: 79cm x 30cm x 200cm
lateral DX unit: 110cm x 30cm x 210cm
lateral SX unit: 110cm x 30cm x 210cm
