SIDEROID ZENITH cabinet

Design: Livio Ballabio + CTRLZAK
Production: JCP, 2017

*“The inhabitants
Revere and preserve the things
That fall from the sky”*

Haiku by Alistair Gentry

An object of desire coming from the stars (de sidere “from the stars,” from sidus (genitive sideris) “heavenly body, star, constellation”). An art object that doubles as a small container of precious items. Based on the scan of a real meteorite found in “Sikhote-Alin” impact site and then printed in 3d, the volume of the meteorite (Siderite iron) is segmented and encapsulated in a block of resin finished in brass details.

Materials: 3D printed meteorite in resin body on metal structure in matte brass finish

Dimensions (H x W x D): 145cm x 36cm x 27cm
